

THE COMPANY'S ENVIRONMENTAL OBJECTIVES

Resimac's intention is to abide by all legislation relating to the environment and has aims and objectives that reflect its activities within its industry.

The Company will make every effort to work towards a cleaner environment and those aims and objectives are to:-

- Minimise any adverse effects on the environment from work activities carried out by its equipment and employees.
- Have regular contact with employees to re-iterate the need to consider the near and far environments when carrying out work activities.
- Liaise with all clients on the most effective methods of working that minimise any potential adverse effects on the environment.
- Consider all people, organisations and others who may be affected by any work activities carried out.
